FP Orientation key (for internal use)

- **FP-1** → Every Child is Unique
- **FP-2** → Holistic & Experiential Learning (process, pace, coverage, activity design)
- **FP-3** → Teacher as Reflective Practitioner
- **FP-4** → Assessment for Learning (diagnosis, evidence, misconception)
- **FP-5** → Collaboration & Community (teacher–teacher, parent, ecosystem)

Practice depth (internal mapping)

For each option, we internally tag two things:

1. FP Orientation
2. Practice Depth Band

Practice depth bands (Internal design only)

Code	Depth Band	Meaning in classroom terms
D1	Procedural	Rule-based, default, surface action
D2	Responsive	Adjusts based on situation
D3	Diagnostic	Uses evidence to decide next step
D4	Adaptive	Intentionally redesigns practice

Anchor questions

1. When students don't understand a topic, what do you usually think first?

A. *I need to explain it more clearly* (FP2 D1)
B. *Which students are struggling and why* (FP1 D3)
C. *How many students answered correctly* (FP4 D1)
D. *What activity might help them grasp it* (FP2 D2)

2. When a lesson doesn't work as expected, you are most likely to:

A. Reflect on what you could change next time (FP3 D1)
B. Discuss it with another teacher (FP5 D3)
C. Stick to the plan and move ahead (FP2 D1)
D. Check student work to see what went wrong (FP4 D2)

Teacher's NEP Readiness- Daily practice questions

1. When two students learn at very different speeds, what do you usually do?

A. Continue teaching at the same pace for everyone (FP2 D1)
B. Give extra homework to the slower learner (FP2 D1)
C. Provide varied support so both can progress (FP1 D2)
D. Ask the faster learner to help the slower one (FP5 D2)

2. How do you understand a child's strengths or interests?
(What this measures: Each Child is Unique)

A. By looking at test scores (FP4 D1)
B. By observing classroom behaviour and interactions (FP1 D2)
C. By asking parents during PTMs (FP5 D2)
D. I don't specifically track strengths or interests (FP2 D1)

3. How do you ensure shy students participate?
(What this measures: Each Child is Unique)

A. Call them out randomly so they answer (FP2 D1)
B. Pair them with confident students (FP5 D2)
C. Create low-pressure activities where everyone contributes (FP1 D3)
D. Let them stay quiet—they will talk when ready (FP2 D1)

4. Before starting a new chapter, how do you check learning levels?
(**What this measures:** Diagnosing Learning Levels)

A. I don't—everyone starts fresh (FP2 D1)
B. By giving a quick informal check (questions/activity) FP4 D3)
C. By checking the previous exam scores (FP4 D1)
D. By asking students if they already know the topic (FP1 D2)

5. When a child performs poorly, how do you find the cause?
(**What this measures:** Diagnosing Learning Levels)

A. Assume the child didn't study (FP2 D1)
B. Re-check the question paper (FP4 D2)
C. Use small diagnostic tasks to find exact gaps (FP4 D3)
D. Talk to the parent first (FP5 D2)

6. How often do you assess progress during teaching?
(**What this measures:** Diagnosing Learning Levels)

A. Only during exams (FP4 D1)
B. Only when I feel students are slow (FP2 D2)
C. Weekly informal checks (FP4 D3)
D. Daily quick checks (exit slips, oral checks, tasks) (FP4 D4)

7. What guides your lesson planning the most?
(**What this measures:** Competency-Based Learning)

A. Completing the chapter on time (FP2 D1)
B. Ensuring students remember key facts (FP2 D1)
C. Building specific competencies/skills (FP2 D3)
D. Following what other teachers do (FP5 D2)

8. How do you check if students can *apply* their learning?
(**What this measures:** Competency-Based Learning)

A. By asking them to memorise definitions (FP2 D1)
B. By giving tasks that require real-life application (FP2 D3)
C. By giving more fill-in-the-blanks (FP2 D1)
D. By checking notebook completeness (FP2 D1)

9. Which activity do you prefer to build competencies?
(**What this measures:** Competency-Based Learning)

A. Only textbook questions (FP2 D1)
B. Worksheets focused on recall (FP2 D1)
C. Real-life problem-solving tasks (FP2 D3)
D. Dictation and repetition (FP2 D1)

10. When did you last try a new teaching method or tool?
(**What this measures:** Teacher Upskilling)

A. I rarely try new methods (FP3 D1)
B. Within the last year (FP3 D2)
C. Within the last few months (FP3 D3)
D. This week or last week (FP3 D4)

11. How do you view feedback on your teaching?
(**What this measures:** Teacher Upskilling)

A. It is uncomfortable (FP3 D1)
B. It is acceptable but not necessary (FP3 D2)
C. It helps me improve (FP3 D3)
D. I actively seek it (FP3 D4)

12. How do you stay updated about best practices?
(**What this measures:** Teacher Upskilling)

A. I don't actively update myself (F3 D1)
B. I follow what senior teachers do (F5 D2)
C. I attend trainings when assigned (F3 D3)
D. I proactively learn from courses, reading, or peers (F3 D4)

13. How often do you communicate learning progress to parents (not just marks)?
(**What this measures:** Parent–Teacher Collaboration)

A. Only during PTMs (FP5 D1)
B. Once every few months (FP5 D2)
C. Monthly updates (FP5 D3)
D. Regular short updates (weekly/fortnightly) (FP5 D4)

14. What do you usually discuss with parents?
(**What this measures:** Parent–Teacher Collaboration)

A. Only if child is misbehaving (FP2 D1)
B. Mostly marks and homework (FP4 D1)
C. Strengths and areas for improvement (FP1 D3)
D. Specific strategies to support learning at home (FP5 D3)

15. How do you involve parents in the child's learning?
(**What this measures:** Parent–Teacher Collaboration)

A. I don't involve them much (FP2 D1)
B. Ask them to ensure homework is done (FP2 D1)
C. Share simple activities to do at home (FP5 D2)
D. Work with them as partners, discussing progress and strategies (FP5 D4)

Situation-Based Questions

1. A student consistently makes the same mistake in Maths despite your explanations. What do you MOST likely do next?

A. Repeat the explanation one more time, but more clearly. (FP2 D1)
B. Ask the child to practice more questions of the same type. (FP2 D1)
C. Give a small task to check exactly where the misconception is happening (FP4 D3)
D. Tell the parent the child needs more practice at home.(FP5 D2)

What this measures: Diagnosing Learning Levels
(Ability to diagnose, not assume; preference for formative assessment.)

2. Which statement do you agree with the MOST?

A. Some children are naturally better at learning than others.(FP2 D1)
B. Every child can learn, but some may need different types of support (FP1 D3)
C. If students work hard, all students can reach the same level (FP2 D2)
D. Children who score well usually have higher ability (FP4 D1)

What this measures: Each Child is Unique
(Implicit beliefs about student ability → growth mindset vs. fixed mindset.)

3. Your class has finished a chapter, but many students can't apply the concept to real-life problems. What do you do?

A. Move ahead because syllabus completion is important.(FP2 D1)
B. Give more revision worksheets for the same chapter.(FP2 D1)
C. Pause and give new activities that involve using the concept in real situations.(FP2 D3)
D. Ask students to memorise key points so they don't forget.(FP2 D1)

What this measures: Competency-Based Learning
(Application-orientation vs. recall-oriented instruction.)

4. When was the last time you changed or experimented with a classroom strategy *because you realised something wasn't working*?

A. This week or last week.(FP3 D4)
B. In the last 1–2 months.(FP3 D3)
C. Sometime this year.(FP3 D2)
D. I usually stick to the strategies I already know (FP3 D1)

What this measures: Teacher Upskilling
(Actual professional adaptiveness, not stated enthusiasm.)

5. When parents ask what they can do to support learning at home, you MOST often:

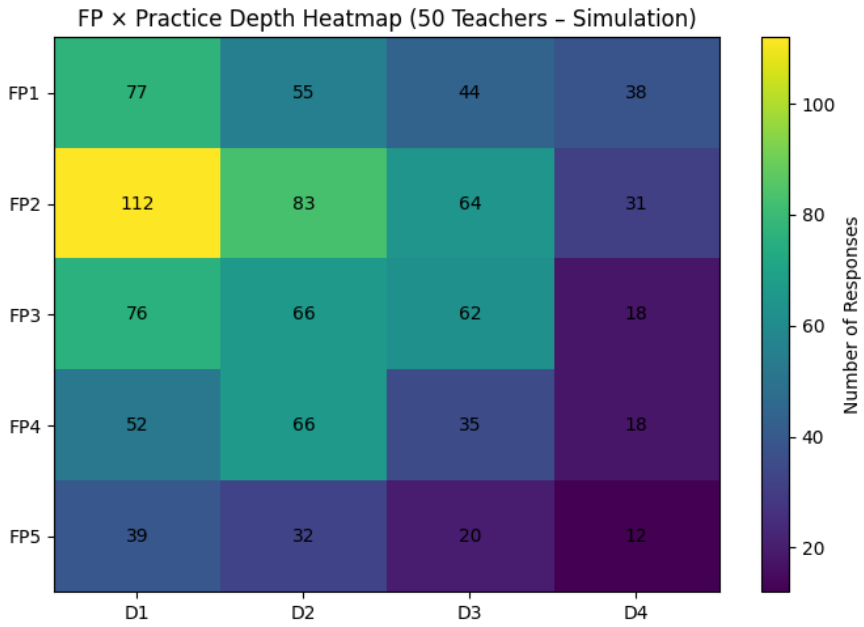
A. Give them 1–2 simple activities they can do with the child. (FP5 D3)
B. Tell them to ensure the child completes homework on time.(FP2 D1)
C. Say that most learning happens in school and not to worry.(FP2 D1)
D. Usually do not give suggestions; parents choose their own methods.(FP2 D1)

What this measures: Parent–Teacher Collaboration
(Actual behaviour vs. ideal behaviour in parent collaboration.)

Simulation 50 teachers

FP	D1	D2	D3	D4
FP1	77	55	44	38
FP2	112	83	64	31
FP3	76	66	62	18
FP4	52	66	35	18
FP5	39	32	20	12

Heatmap



Insights
FP-2 (Holistic & Experiential) dominates, largely concentrated in D1,ÄìD2 (procedural to responsive practice).
FP-3 (Reflective Practitioner) shows spread into D3, indicating reflective practice but limited adaptivity.

FP-4 (Assessment for Learning) is skewed toward D1, suggesting assessment-as-ritual rather than diagnosis.
FP-5 (Collaboration & Community) appears least and rarely reaches D4.
Adaptive practice (D4) is sparse across all FPs, a clear target for micro-interventions.

Leader–teacher alignment view

Are classroom practices developing depth in the same NEP dimensions that leaders are oriented toward?

Core alignment Summary (Simulation example from leadership and teachers readiness)

This alignment view helps us understand how leadership attention to NEP principles is translating into the depth of everyday classroom practice, and where targeted support is needed.

Foundational Principle (FP)	Leader Orientation (Attention)	Teacher Orientation	Teacher Avg Depth	Alignment Reading	What It Means
FP-1: Every Child is Unique	Medium	Medium	**High (D3)**	✅ Practice-led strength	Teachers attend to learner differences with diagnostic depth, even if leadership focus is moderate
FP-2: Holistic & Experiential Learning	**High**	**High**	**Low–Mid (D1–D2)**	⚠️ Intent–Practice Gap	Strong intent exists, but classroom enactment is still procedural
FP-3: Reflective Practitioner	Medium	Medium	**Mid–High (D2–D3)**	✅ Stable translation	Reflection is present and translating reasonably into practice
FP-4: Assessment for Learning	Medium	Medium	**Low (D1)**	⚠️ Ritualised practice	Assessment is happening, but

					mostly for checking, not diagnosis
FP-5: Collaboration & Community	Low	Low–Medium	**Mid (D2)**	⚠️ Emerging capability	Collaboration exists in pockets but is not yet systemic
