Intervention-1: Lightweight practice tasks

(Consistency & Translation Check)

Design intent

- Tasks must be:
  - **doable in 5–10 minutes**
  - **embedded in normal teaching**
  - **non-reporting, non-evaluative**
- Logging is **binary or very simple** (Done / Partially / Not yet)
- Tasks connect back to:
  - FP orientation
  - Practice depth
  - Enablement signals

This is **not homework for teachers**. This is *practice noticing*.

1. Teachers experience this (UX mental model – Engineering form)

Based on earlier baseline, few small things to try for the next 2-3 weeks.
Pick 3 to 5. Log what you actually tried. ----- Note to teachers on form

2. Task structure (canonical) -Design

Each task has:

- Task ID
- FP tag
- Depth shift intent (D1→D2, D2→D3, etc.)
- Effort level (Very low / Low)
- Logging type (checkbox / 1-click / short note)

3. The 12 Core Tasks (Intervention-1 Set)

FP-1: Every child is unique (learner lens)

Task 1- "Notice One Learner"

- Pick one student today and notice *how* they engage (not marks).
- **Depth intent:** D1 → D2
- **Log:** `Noticed / Didn't get time`

Task 2- "One Adjustment"

- Make one small adjustment (pace, example, grouping) for a learner.
- **Depth intent:** D2 → D3
- **Log:** `Tried / Planned but didn't try`

FP-2: Holistic & experiential learning

Task 3- "Change One Example"

- Replace one textbook example with a real-life/contextual one.
- **Depth intent:** D1 → D2
- **Log:** `Used / Didn't use`

Task 4- "Ask a Why / How"

- Ask at least one "why" or "how" question during teaching.
- **Depth intent:** D2 → D3
- **Log:** `Asked / Forgot`

FP-3: Reflective practitioner

Task 5- "End-of-Class Reflection"

- At end of class, mentally note one thing that worked / didn't.
- **Depth intent:** D1 → D2
- **Log:** `Reflected / Skipped`

Task 6- "Try One Small Change"

- Try one change in the next class based on your reflection.
- **Depth intent:** D2 → D3

- **Log:** `Tried / Not yet`

FP-4: Assessment for learning

Task 7- "Quick Check"

- Ask 2–3 students to explain an answer in their own words.
- **Depth intent:** D1 → D2
- **Log:** `Did / Didn't`

Task 8- "Spot One Pattern"

- Notice one common mistake or misunderstanding today.
- **Depth intent:** D2 → D3
- **Log:** `Noticed / Not yet`

FP-5: Collaboration & community

Task 9- "Teacher Touchpoint"

- Share one classroom moment with another teacher.
- **Depth intent:** D1 → D2
- **Log:** `Shared / Not yet`

Task 10- "Parent Signal"

- Share one positive learning observation with a parent (informal).
- **Depth intent:** D1 → D2
- **Log:** `Shared / Not possible`

Cross-FP (Very important)

Task 11- "Student Voice"

- Ask one student: *"What helped you learn today?"*
- **Depth intent:** D2 → D3
- **Log:** `Asked / Didn't ask`

Task 12-"Pause & Name"

- Pause once and name what students are doing well in learning.
- **Depth intent:** D2 → D3

- **Log:** Named / Missed

4. How teachers select tasks (critical) ------ design

- System **recommends 5 tasks** based on:
  - FP gaps
  - Low depth areas
  - Enablement perception
- Teacher **chooses any 3–5**
- No penalty for not choosing all

This preserves autonomy.

5. Logging design----- ultra-light design

Per task, per day:

- Single tap:
  - Did it
  - Didn't get time
- Optional (once per week):
  - "Anything you noticed?" (1 line)

No compulsory text.

6. What this will gives us analytically

We will now get **four aligned layers**:

Layer	Signal
FP Orientation	What teachers attend to
Practice Depth	How they enact
Enablement Perception	What support feels like
Task Consistency	What actually gets tried

This will allows us to distinguish:

- capability gap vs system gap vs habit gap

7. What should change after Intervention-1 (expected outcomes)

We are **not** expecting:

- Depth to jump to D4
- Perfect consistency

You *are* expecting:

- Increased D2 → D3 signals
- Reduction in "enablement–depth mismatch"
- More confidence in trying

That's success.

8. How this feeds Intervention-2 (later)

Intervention-1 answers:

"Are teachers able to act on small nudges consistently?"

Only **then** we should introduce:

- deeper pedagogical tools
- structured diagnostics
- collaborative design tasks

Intervention-1 is not about changing teaching.
It is about checking whether change is even possible with minimal friction.
