SET-Structured Explanation of Translation

Canonical Interpretation Language

We capture intent (orientation), enactment maturity (practice depth), and enabling conditions (teacher & leadership lenses). SET is the method we use to explain how intent translates into practice under real school conditions without scoring or ranking.

Given the orientation alignment (leaders + teachers) and practice depth, **Practice Diagnostics (with Areas)** sit on top, and **next-level intent signals** are read from that layering.

SRI signal logic, grounded explicitly in the three instruments used so far.

- Leader orientation design
- Teacher practice depth & FP tagging
- Practice diagnostics (Area-based enablement lenses)

A. Orientation (Leaders + Teachers)

- Orientation = **lens of attention**
- It answers the question: **"Where does attention naturally go first?"**
- It is **not** about skill, effort, or quality.

Orientation is *intent without friction.*

B. Practice Depth (Teacher)

- Depth = **how far intent translates into action**
- D1 → procedural
- D2 → responsive
- D3 → diagnostic
- D4 → adaptive

Depth is *intent under classroom constraints.*

myelin
excellence for educators

C. Practice Diagnostics (Area-based)

- Diagnostics = **conditions surrounding practice**
- Area-based, not FP-based
- It answers:**"What is making this practice easier or harder?"**

Diagnostics are *system reality as experienced*.

2. The correct stacking order

The correct interpretive stack is: Orientation → Practice Depth → Practice diagnostics (areas)

This matters because:

- Diagnostics **explain** depth
- They do not define orientation and
- They should never be read in isolation

3. Key signals extracted explicitly (and why)

SIGNAL SET 1

Orientation Alignment × Practice Depth

(Intent → Enactment) Collected in FP assessments

It tells:

- Where intent is shared
- Where enactment lags or stabilises

This gives you **WHERE to look deeper**, not *why* yet.

SIGNAL SET 2

Practice Depth × Practice Diagnostic *Areas*

(Enactment → Conditions)

Here the **Practice Diagnostics lens comes in**. Each **Area** should be read as a *constraint or accelerator* on depth.

SET explains why observed practice depth looks the way it does, given orientation, by using system-condition areas and their sub-areas.

SET is not a score, a variable or a model. SET is a **disciplined reading grammar**.

SET–Teacher lens (A1–A4)

Table 1: Teacher SET Canonical Structure

Area (A)	Sub-areas (from instrument)	Canonical Reading Rule	Canonical Interpretation Sentences (examples)
A1: Continuous Learning Diagnostics	Access, Usability, Follow-through, Collective Use, Student Clarity	A1 explains whether teachers can *see learning clearly enough to act diagnostically*.	• Low FP-4 depth + A1 (Access ↓, Usability ↓) → Teachers value assessment but lack usable tools to identify learning gaps. • Low FP-4 depth + A1 (Follow-through ↓) → Diagnostic information exists, but time/support to act is missing. • FP-4 stalls at D2 + A1 (Collective Use ↓) → Assessment remains individual and does not mature through shared sense-making. • FP-1 depth low + A1 (Student Clarity ↓) → Learner uniqueness is acknowledged, but students are not yet partners in understanding learning.

A2: Teacher Development & Growth Support	Structure, Safety, Peer Learning, Experimentation, Growth Culture	A2 explains whether teachers feel *safe and supported enough to change practice*.	• FP-3 depth at D2 + A2 (Safety ↓, Experimentation ↓) → Teachers reflect privately but hesitate to try visible changes. • Low depth + A2 (Structure ↓) → Teachers lack guided pathways to convert intent into sustained practice. • D3 reflection + A2 (Peer Learning ↓) → Reflective capacity exists, but growth is isolated. • High orientation + A2 (Growth Culture ↓) → Belief exists, but change is not experienced as a supported journey.
A3: Holistic Progress Card (HPC) Enablement	Understanding, Clarity, Time, Use, Student Role	A3 explains whether holistic intent has a *shared language and usable structure*.	• High FP-2 orientation + A3 (Understanding ↓, Clarity ↓) → Holistic learning is valued but lacks a common interpretive frame. • FP-4 depth at D1 + A3 (Use ↓) → HPC is treated as reporting, not a learning artefact. • FP-1 depth low + A3 (Student Role ↓) → Progress is observed about students, not with students. • Moderate depth + A3 (Time ↓) → Understanding exists, but daily integration is constrained.
A4: Parent & Community Support (Teacher Experience)	Communication Support, Guidance, Facilitation, Recognition	A4 explains whether collaboration is *institutionally enabled or personally carried*.	• FP-5 depth low + A4 (Facilitation ↓) → Teachers value collaboration but manage it individually. • Emerging FP-5 depth + A4

			(Recognition ↓) → Collaborative practices exist but remain invisible. • High FP-1 intent + A4 (Guidance ↓) → Teachers want to involve families but lack shared approaches.

Teacher SET **does NOT say**

- Teachers lack intent
- Teachers resist NEP
- Training alone will fix this

It says: **Translation is constrained by specific, addressable conditions.**

SET – Leadership Lens (B1–B4)

Table 2: Leadership SET Canonical Structure

Area (B)	Sub-areas (from instrument)	Canonical Reading Rule	Canonical Interpretation Sentences (examples)
B1: NEP Governance & Ownership	Ownership clarity, Translation to action, Distribution	B1 explains whether leadership intent is *operationally owned or diffusely held.*	• High FP orientation + B1 (Ownership ↓) → NEP intent exists, but accountability is unclear. • B1 (Translation ↓) → Vision is articulated but not converted into school-level routines.
B2: Data-Informed Decision Culture	Review practices, Decision use, Support for change	B2 explains whether data *influences decisions or remains informational.*	• B2 (Review ↑, Decision use ↓) → Data is discussed but not decisive. • B2 (Support ↓) → Decisions exist but are

			not resourced for follow-through.
B3: Teacher Development Culture	PLC regularity, Safety, Experimentation protection	B3 explains whether teacher learning is *protected, not just permitted*.	• B3 (PLC ↑, Safety ↓) → Reflection spaces exist, but risk-taking is constrained. • B3 (Experimentation ↓) → Innovation depends on individual courage.
B4: HPC & Reporting Culture	Purpose clarity, Parent orientation, Teacher support	B4 explains whether holistic reporting is *developmental or compliance-driven*.	• B4 (Purpose ↓) → HPC exists structurally but lacks shared meaning. • B4 (Teacher support ↓) → Reporting is mandated without pedagogic scaffolding.

SET Sentence Template (Engineering & Research)

Synthesis grammar**:**

Given [FP orientation], and observed practice depth at [Dx], translation is shaped by [Area + specific sub-areas], indicating that [condition], rather than intent, is the limiting factor.

Example

Given high FP-2 orientation and practice depth at D1–D2, translation is shaped by low A3 clarity and limited A1 follow-through, indicating that lack of shared language and actionable diagnostics—not teacher resistance—is the limiting factor.

SET is a structured way to explain how NEP intent becomes—or fails to become—classroom practice under real conditions.
It preserves dignity, avoids blame, and enables targeted action.

Engineering design

SET COMPUTATION SPECIFICATION

SET1-Orientation Alignment × Practice Depth

Purpose: Identify *where* translation gaps exist
Nature: Structural, descriptive (no causality)

Table SET1.1 — Inputs

Input Name	Source Instrument	Unit	Type
`leader_fp`	Leadership Orientation	Leader	Categorical (FP1–FP5)
`teacher_fp`	Teacher Orientation	Teacher	Categorical (FP1–FP5)
`teacher_depth`	Teacher Practice Diagnostics	Teacher	Ordinal (D1–D4 → 1–4)
`cluster_id`	System	Group	Key
`school_id`	System	Group	Key
`demography_keys`	System	Group	Optional keys

Table SET1.2 — Aggregations (per group: cluster/school)

Derived Variable	Formula
`pL_k`	count(leaders with FPk) / total leaders
`pT_k`	count(teachers with FPk) / total teachers
`D_k`	avg(teacher_depth where teacher_fp = FPk)
`dominant_fp_leader`	argmax(pL_k)
`dominant_fp_teacher`	argmax(pT_k)
`alignment_gap_k`	pT_k - pL_k

Table SET1.3-Banding Rules

Measure	Band	Rule
Orientation strength	High	$p \geq 0.30$
	Medium	$0.15 \leq p < 0.30$
	Low	$p < 0.15$
Practice depth	Low	$D < 2.2$

	Mid	2.2 ≤ D < 3.0
	High	D ≥ 3.0

Table SET1.4 — Derived Alignment States (per FP)

Condition	Alignment State
Leader High + Teacher High + Depth Low	`intent_high_translation_low`
Teacher High + Leader Low	`teacher_led_intent`
Leader High + Teacher Low	`leader_led_intent`
Both Low	`low_attention_zone`
Both High + Depth High	`intent_translation_aligned`

Table SET1.5 — SET1 Outputs

Output	Description
`leader_orientation_dist`	{FPk: pL_k}
`teacher_orientation_dist`	{FPk: pT_k}
`teacher_depth_by_fp`	{FPk: D_k}
`alignment_gap_by_fp`	{FPk: alignment_gap_k}
`alignment_state_by_fp`	{FPk: state}

SET1 Guardrails

- No scoring
- No individual-level outputs
- No causality claims

SET1 answers **WHERE to look deeper**, nothing more.

SET outputs are aggregated at cluster/school level for research and program design; individual-level views, if any, are limited to self-reflection dashboards and are never used for evaluation, ranking, or reporting.

SET2-Practice Depth × Practice Diagnostics (Areas)

Purpose: Explain *WHY* translation looks the way it does
Nature: Explanatory, conditional

Table SET2.1-Inputs

Input Name	Source Instrument	Unit	Type
teacher_depth	Teacher Practice Diagnostics	Teacher	Ordinal (1–4)
A1_subareas	Practice Diagnostics	Teacher	Likert (1–4)
A2_subareas	Practice Diagnostics	Teacher	Likert (1–4)
A3_subareas	Practice Diagnostics	Teacher	Likert (1–4)
A4_subareas	Practice Diagnostics	Teacher	Likert (1–4)
teacher_fp	Teacher Orientation	Teacher	Categorical (FP1–FP5)

Table SET2.2 — Area & Sub-area Structure

Area	Sub-areas
A1	Access, Usability, FollowThrough, CollectiveUse, StudentClarity
A2	Structure, Safety, PeerLearning, Experimentation, GrowthCulture
A3	Understanding, Clarity, Time, Use, StudentRole
A4	Communication, Guidance, Facilitation, Recognition

Table SET2.3 — Aggregations

Derived Variable	Formula
A1_score	mean(A1_subareas)
A2_score	mean(A2_subareas)
A3_score	mean(A3_subareas)
A4_score	mean(A4_subareas)
A1_subarea_mean_x	mean(A1_x)
A2_subarea_mean_x	mean(A2_x)
etc.	

(Computed per group: cluster/school/demography)

Table SET2.4 — Banding Rules

Measure	Band	Rule
Area / Sub-area	Low	< 2.5
	Mid	2.5 – 3.2

	High	> 3.2

Table SET2.5 — Explainability links (NOT ownership)

FP	Diagnostic Areas Used for Explanation
FP1	A1, A3
FP2	A3, A2
FP3	A2
FP4	A1, A3
FP5	A4

Table SET2.6 — Canonical Sentence Firing Rules (Example)

Sentence ID	FP	Depth Condition	Area/Sub-area Condition
SET2_FP4_A1_LOW	FP4	Depth = Low	A1_Access = Low AND A1_Usability = Low
SET2_FP2_A3_LOW	FP2	Any	A3_Clarity = Low
SET2_FP3_A2_SAFETY	FP3	Depth ≤ Mid	A2_Safety = Low

Table SET2.7 — SET2 Outputs

Output	Description
`area_means`	{A1..A4: mean}
`subarea_means`	{A1_x, A2_y, ...}
`fp_explainers`	{FPk: [Areas used]}
`fired_sentence_ids`	List of explanation IDs
`condition_flags`	e.g., `low_follow_through`, `low_safety`

SET2 Guardrails

- Areas never redefine orientation
- Areas never create scores
- SET2 never runs without depth

SET2 answers **WHY translation looks this way**.

Leader Areas (B1–B4) must be first-class citizens in SET2, otherwise the explanation layer becomes teacher-heavy and structurally incomplete.

SET2-Leadership lens (B1–B4)

Purpose: Explain *system-level conditions shaping translation*
Nature: Explanatory, contextual (never evaluative)

Table SET2.B1 — Leader Area Inputs

Input Name	Source Instrument	Unit	Type
`B1_subareas`	Leadership Readiness Survey	Leader	Likert (1–4)
`B2_subareas`	Leadership Readiness Survey	Leader	Likert (1–4)
`B3_subareas`	Leadership Readiness Survey	Leader	Likert (1–4)
`B4_subareas`	Leadership Readiness Survey	Leader	Likert (1–4)
`leader_fp`	Leadership Orientation	Leader	Categorical (FP1–FP5)
`cluster_id`	System	Group	Key
`school_id`	System	Group	Key

Table SET2.B2 — Leader area & sub-area structure

Area (B)	Sub-areas (from instrument)
B1: NEP Governance & Ownership	OwnershipClarity, TranslationToAction, ResponsibilityDistribution
B2: Data-Informed Decision Culture	ReviewPractice, DecisionUse, ChangeSupport
B3: Teacher Development Culture	PLCRegularity, Safety, ExperimentationProtection
B4: HPC & Reporting Culture	PurposeClarity, ParentOrientation, TeacherSupport

Table SET2.B3 — Leader Area Aggregations

(Computed per cluster / school — never individual)

Derived Variable	Formula
`B1_score`	mean(B1_subareas)

B2_score	mean(B2_subareas)
B3_score	mean(B3_subareas)
B4_score	mean(B4_subareas)
B1_subarea_mean_x	mean(B1_x)
B2_subarea_mean_x	mean(B2_x)
etc.	

Table SET2.B4 — Leader Banding Rules

Measure	Band	Rule
Area / Sub-area	Low	< 2.5
	Mid	2.5 – 3.2
	High	> 3.2

(Same thresholds as Teacher areas- important for coherence)

Table SET2.B5 — Leader Explainability Links

(System-side explanation; NOT ownership)

FP	Leader Areas Used for Explanation
FP1 (Every Child Unique)	B2, B4
FP2 (Holistic / Experiential)	B1, B4
FP3 (Reflective Practitioner)	B3
FP4 (Assessment for Learning)	B2, B4
FP5 (Collaboration & Community)	B1, B3

These links explain **why leadership intent may or may not translate into teacher practice**, not whether leaders "did enough".

Table SET2.B6 — Canonical Leader SET2 Sentence Rules (Examples)

Sentence ID	FP	Depth Condition (Teacher)	Leader Area Condition

SET2_FP2_B1_TRANSLATION_LOW	FP2	Depth ≤ Mid	B1_TranslationToAction = Low
SET2_FP4_B2_DECISION_LOW	FP4	Depth = Low	B2_DecisionUse = Low
SET2_FP3_B3_SAFETY_LOW	FP3	Depth ≤ Mid	B3_Safety = Low
SET2_FP5_B1_DISTRIBUTION_LOW	FP5	Any	B1_ResponsibilityDistribution = Low

Table SET2.B7 — Leader SET2 Outputs

Output	Description
`leader_area_means`	{B1..B4: mean}
`leader_subarea_means`	{B1_x, B2_y, ...}
`fp_leader_explainers`	{FPk: [B-areas]}
`leader_fired_sentence_ids`	List of explanation IDs
`leader_condition_flags`	e.g., `low_translation`, `low_safety`, `weak_decision_use`

How Teacher & Leader SET2 Co-exist (Critical Rule)

Rule	Meaning
Teacher SET2 explains	*Classroom-side constraints*
Leader SET2 explains	*System-side constraints*
Never merge at individual level	Protects dignity & validity
Combine only at cluster/school level	Enables structural insight

Final Guardrails

- No teacher–leader response comparison
- No leader judgement from B-areas
- No scoring across A + B

SET2 remains **explanatory**, not evaluative.

SET1 identifies where intent and enactment diverge.
SET2 explains why translation is constrained, using teacher-side (A) and system-side (B) conditions.

SET1 × SET2 — Combined archetype specification

How to read these tables

An archetype emerges when a SET1 alignment state intersects with dominant SET2 condition patterns (A-areas and/or B-areas).

Archetypes are:

- descriptive, not judgemental
- group-level only (cluster / school / demographic slice)
- used for **sense-making and intervention design**, not scoring

Table A — Core SET1 × SET2 Archetypes (Primary)

Archetype ID	SET1 Alignment State	Teacher SET2 Conditions (A)	Leader SET2 Conditions (B)	Canonical Interpretation (internal)
ARCH-01	intent_high_translation_low	A1 ↓ (Access/Usability), A3 ↓ (Clarity)	B4 ↓ (PurposeClarity)	Shared holistic intent exists, but lack of shared language and usable tools limits classroom translation.
ARCH-02	intent_high_translation_low	A2 ↓ (Safety, Experimentation)	B3 ↓ (Safety)	Teachers reflect but hesitate to act due to low psychological and institutional safety.
ARCH-03	teacher_led_intent	A3 ↓ (Time, Use)	B1 ↓ (TranslationToAction)	Teachers move ahead of systems; leadership intent has not yet operationalised support structures.
ARCH-04	leader_led_intent	A1 ↓ (FollowThrough)	B2 ↓ (DecisionUse)	Leadership intent exists, but classroom enactment stalls due to weak diagnostic follow-

				through and decision coupling.
ARCH-05	low_attention_zone	A1 ↓, A2 ↓	B1 ↓, B3 ↓	NEP intent has not yet entered collective attention; foundational orientation work is required.
ARCH-06	intent_translation_aligned	A1 ↑, A2 ↑	B2 ↑, B3 ↑	Intent, enactment, and system conditions are coherently aligned; focus shifts to sustaining depth.

Table B — FP-Specific Archetypes (Secondary Layer)

Archetype ID	FP Focus	SET1 Pattern	SET2 Dominant Conditions	Interpretive Label
FP2-A	FP2	High orientation + Low depth	A3 ↓, B4 ↓	*Holistic intent without shared meaning*
FP4-A	FP4	Medium orientation + Low depth	A1 ↓, B2 ↓	*Assessment valued, diagnostics weak*
FP3-A	FP3	Medium orientation + Mid depth	A2 ↓, B3 ↓	*Reflection without safety*
FP5-A	FP5	Low orientation + Low depth	A4 ↓, B1 ↓	*Collaboration structurally unsupported*
FP1-A	FP1	High orientation + Mid depth	A1 ↓, A3 ↓	*Learner uniqueness acknowledged but not operationalised*

Table C — Teacher–system tension archetypes

Archetype ID	SET1 Signal	Teacher Conditions (A)	Leader Conditions (B)	Tension Description
TENS-01	Teacher-led intent	A2 ↑	B3 ↓	Teachers willing to grow, but PLC and experimentation not institutionally protected.
TENS-02	Leader-led intent	A1 ↓	B2 ↑	Systems generate data, but teachers lack tools/time to act.
TENS-03	Alignment present	A3 ↓	B4 ↓	Both sides value holistic progress, but reporting remains compliance-oriented.

Table D — Archetype detection rules (Engineering)

Condition Block	Rule
SET1 trigger	alignment_state_by_fp == intent_high_translation_low
Teacher SET2 trigger	≥2 A-areas in Low band
Leader SET2 trigger	≥1 B-area in Low band
Archetype assignment	Match highest-confidence archetype (priority-ordered)
Multiple matches	Assign primary + secondary archetype
No strong match	Label as emerging_pattern

Table E — Archetype output schema

Field	Description
`archetype_id`	Primary archetype
`secondary_archetypes`	Optional list
`fp_context`	FP(s) where archetype appears
`teacher_conditions`	{A-area/subarea flags}
`leader_conditions`	{B-area/subarea flags}
`confidence_level`	Low / Medium / High (based on signal strength)

Hard Guardrails

- No archetype at individual level
- No archetype naming exposed to users initially
- Archetypes do not imply performance ranking

Archetypes are **sense-making constructs**, not evaluations.

SET Archetypes describe recurring patterns in how NEP intent translates—or fails to translate-under specific classroom and system conditions.
