Project क्षितिज: Foundational philosophies (FPs) Myelin restatement

FP-1: Every Child is Unique

(Learner-Centric & Inclusive Education)

FP-1 in NEP-2020 is about:

- Recognising diversity in learners' pace, interests, abilities, and contexts
- Moving away from a "one-size-fits-all" classroom assumption
- Designing learning pathways that respond to *how children learn*, not just *what is taught*
- Ensuring inclusion is pedagogic, not only administrative

Please remember:
FP-1 is **ethically strong but operationally demanding**.
It is often *believed in* before it is *designed for*.

FP-1 signals intent to personalise learning- not proof that differentiation is happening.

FP-2: Holistic & Experiential Learning

(Learning Beyond Rote and Marks)

FP-2 in NEP-2020 is about:

- Learning beyond rote memorisation and exam performance
- Connecting concepts to lived experiences and real contexts
- Integrating cognitive, emotional, social, and ethical dimensions of learning
- Shifting from content coverage to meaning-making

Remember:
FP-2 is **aspirational, visible, and language-friendly**.
It is the most intuitive entry point into NEP thinking.

FP-2 signals shared aspiration-not depth of enactment.

FP-3: Teacher as Reflective Practitioner

(Continuous Professional Reflection)

FP-3 in NEP-2020 is about:

- Teachers regularly reflecting on their instructional choices
- Using classroom experience as a source of learning and improvement
- Moving from "delivery" to *professional judgement*
- Seeing teaching as an evolving craft, not a fixed routine

Please remember:
FP-3 is **internally practiced but externally fragile**.
Reflection often exists *in the mind*, not *in the system*.

FP-3 signals cognitive readiness-not visible change unless supported.

FP-4: Assessment for Learning

(Diagnostic, Formative Assessment)

FP-4 in NEP-2020 is about:

- Using assessment to understand learning gaps, not just rank students
- Treating assessment as part of the learning process
- Providing feedback that informs next instructional steps
- Shifting from summative judgement to formative insight

Please remember:
FP-4 is **structurally disruptive**.
It challenges long-standing exam, reporting, and time-table logics.

FP-4 signals intent to diagnose-not evidence of diagnostic action.

FP-5: Collaboration & Community Engagement

(Teacher–Teacher, Teacher–Parent, School–Community)

FP-5 in NEP-2020 is about:

- Teachers collaborating with peers to improve practice
- Parents as partners in the learning journey
- Schools engaging with the wider community as a learning resource
- Learning seen as a shared responsibility, not an isolated act

Remember:
FP-5 is **structurally dependent**.
It rarely emerges through individual effort alone.

FP-5 signals openness to collaboration-not the existence of enabling structures.

Critical Myelin Framing

FP orientation indicates where attention and belief naturally flow.
It does not indicate depth, quality, or consistency of practice.

This is why:

- Orientation ≠ Enactment
- Orientation ≠ Readiness
- Orientation ≠ Impact

And why SET, practice depth, and diagnostics are essential.

Connection to SRI & SET

This framing ensures:

- FP-2 tilt is read as *entry*, not *achievement*
- FP-4 low depth is read as *system friction*, not *teacher resistance*
- FP-3 signals are treated as *latent capacity*
- FP-1 is not romanticised
- FP-5 is not blamed on individuals

Belief is respected. Translation is investigated.
